

THE TRUTH ABOUT MICHIGAN VACCINE WAIVER RATES:

AND WHY IT MATTERS TO LEGISLATION AND PARENTAL RIGHTS

				
	Charlie	Emma	Jaden	Daniel
Vaccines missing from "required" list for school entry	NONE	MISSING ONE VACCINE	MISSING MMR AND IPV VACCINE	MISSING ALL VACCINES
Parent must file waiver to enroll child in school	NO	YES	YES	YES
Waiver/No Waiver	NO WAIVER	<i>WAIVER</i>	<i>WAIVER</i>	<i>WAIVER</i>
Reason for waiver	Charlie was vaccinated because of international adoption. He did not respond to all his vaccines and is unknowingly, still vulnerable to infection	Emma did not get a Hep B vaccine yet because her parents do not feel she needs it and decided to wait until she was older like Canada does.	Jaden's older brother is autistic from encephalitis and seizures which began the day of his MMR and IPV shots. Her parents feel it is safer to not give those vaccines.	Daniel has a long history of autoimmune disorders in his family. Because of so many conditions and past vaccine reactions in the family they do not vaccinate.
Is the child vaccinated	YES	YES	YES	NO
Is the child immune to all disease that can cause harm	NO	NO	NO	NO
To the average person looking at waiver rates per school this child is perceived as:	VACCINATED AND HEALTHY	NOT VACCINATED AND DANGEROUS	NOT VACCINATED AND DANGEROUS	NOT VACCINATED AND DANGEROUS

Because the waiver rates are not broken down we also do not know if another child like Jaden is missing her vaccines because she is fighting Leukemia. We also don't know if Daniel is not vaccinated because he is Christian Scientist. For whatever reason, waivers should always be the parents choice. It is wrong to force any medication or procedure on anyone for any reason. Please also take into account that it is known that 5 to 15% of vaccinated children are not even immune to the disease they were vaccinated for. (Fail rate)
